

Outdura® is 100 percent woven acrylic. Outdura dries fast, cleans easily and offers unprecedented protection from the sun. The fabric's UV Protection Factor (UPF) is 50+, which is as high as the rating goes and more than three times as high as the minimum recommended by cancer groups.

A special yarn made from solution-dyed acrylic in which the pigment is added while the fiber still is in solution. With this method, the color permeates the fiber so it can't rub off or wash away. Stabilizers are also added in the same way to minimize the effects of the sun, to help the fabric maintain strength over time, and to inhibit rot.

Warranty

Umbrella-weight Outdura carries a five-year limited manufacturer's warranty. The Outdura warranty covers the fabric becoming unserviceable as a result of loss of color or strength from normal exposure conditions, including sunlight, mildew, rot and atmospheric chemicals, if the fabric has been properly installed, used and maintained. The warranty also does not apply against deterioration of any kind due to abusive use, accidental burns, negligence, vandalism, perforations, or acts of God.

Don't all solution-dyed fabrics do what Outdura® does?

Absolutely not, so make sure you purchase 100 percent solution-dyed Outdura® acrylic fabrics. There are other fabrics on the market today that are made from synthetic, solution-dyed fibers that have different names and make similar claims. If they are not solution-dyed acrylic, they will not perform, last or retain color as well as a solution-dyed acrylic.
